In other news, we've added a convenient new feature that allows you to quickly return to today's date. The name: **The Today Button**. Any time you're viewing future or past dates, it's easy to snap back to the current day and view any remaining jobs. Easy to use and a massive time saver for any quick changes you may need to make.

Easy to use and a massive time saver for any quick changes you may need to make.

SM-Mobile takes your business anywhere

Whether you prefer to take your work with you or delegate to someone else, **SM-Mobile 2.0** will help your business run more efficiently, and thus save you money. Here are some of the most exciting additions in **SM-Mobile 2.0**

You can **show locations of all employees**. Users with **SM-Mobile 2.0** can check in to a job site once they arrive and, once a job is complete, they can check out so you can make sure they're on schedule. The GPS feature means you can know where your employees are at any moment, and ensure they check in and out at the job location, not elsewhere.

Scheduling Manager now has the ability to report on regular or recurring clients. The latest version informs you of the most reliable measures of income - your recurring customers. Customize the report to reflect your preferences by showing one-time customers, potential leads, former customers, and even inactive customers. We've included options to show clients of any frequency you wish to view: weekly, biweekly, monthly. Use it to help establish the number of clients providing a steady income stream and forming stable foundation for your business.

With this report, you can easily see which customers offer the most patronage to your business. With our tags feature, you can easily group them for mass emailings, discounts, or whatever extra effort you'd like devote to your customers.

Other Mobile Features

New features for the app include many customization options. For example, you can set what employees can do or show which fields to display. These options provide greater versatility when using the app, streamlining the process of assigning employees and accessing the features you use most.

SM Sync

Another exciting feature for an **SM** user interested in the mobile app is the new **SM-Sync**. Periodically update your customer information without the need for constant internet access. This improved functionality adds ease of use and reduces server costs. With uploading and downloading happening only when you decide, **SM-Sync** allows for the spread of data between the desktop and mobile versions that doesn't need 24/7 upkeep.

Cloud updates: Improved speed of Cloud Sync

For customers interested in working from anywhere, we've improved several features in the **Web Express** version of our software. It's easier than ever to backup your data and access it from home, the job site, or wherever you may be. The speed of the daily calendar has also been radically improved to keep your workday flowing.

Don't forget our great tags feature

Offer great promotions, gather your resources, and keep track of special cases. Tag your clients to organize them, keep track of the industries or client types you currently service, and group clients that require special attention together to maximize your service.

Melbourne Server

Our customers in the South Eastern Hemisphere will love the improved loading times in our web-based apps!

iTunes
