

Have You Seen Our New Look?

Our web site has undergone recent improvements and enhancements. We completely reworked the site to make it more user-friendly, and mobile responsive.

We hope we did a good job of making all the information easy to find and read! We welcome your comments and feedback.

Is Your Site Mobile Friendly?

Did you know that as of April 21, 2015, Google changed its search algorithm, giving higher priority to web sites that are mobile-friendly?

Google has a tool that you can run to determine if your site is mobile ready: <http://www.google.com/webmasters/tools/mobile-friendly/>

If your site does not pass the mobile-friendly test, you may see your search engine placement positions drop, so it's important to check this out!

NEW:Auto Emailing Appointment Reminders

The latest update of the **Scheduling Manager** includes an option to have your appointment reminder emails sent out automatically.

With this new improvement you can specify the time of day you want your appointment reminders to send out, as well as how many days in advance you want the reminders to be sent out.

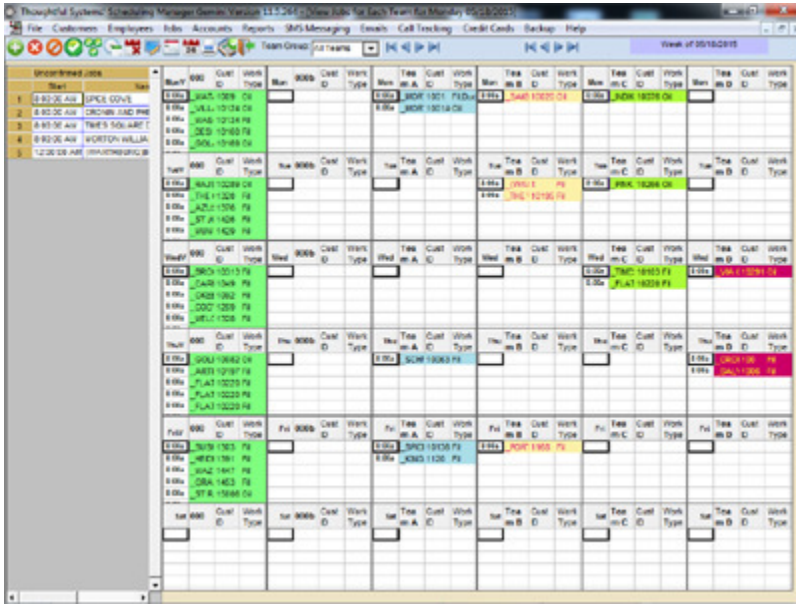

We hope this new addition will help to make your business run even more efficiently and save you even more time, as well as help you provide better customer service!

Job Calendar with Unconfirmed List

We are very pleased to present our new calendar view, which is a 6-day view (Monday-Saturday) and includes an Unconfirmed Jobs List. Some of the features of this calendar are:

- An "Unconfirmed" Jobs list (shown on the left-hand side). You can drag and drop jobs from this list onto a particular team on the calendar once the job is confirmed.
- Show 6 (or more) jobs for each team for each day.
- Color-code each team so that you can easily distinguish between them.
- Choose which items of information you want to be displayed (such as customer name, Work Code, Start Time, etc.).
- Adjust column widths as desired.

Please contact a sales representative if you are interested in adding this feature to your version of the **Scheduling Manager**!
